Summary

As an energetic and passionate entry-level Web Developer, I bring a solid foundation in frontend technologies, paired with a fundamental understanding of backend principles. My bootcamp experience has equipped me with the technical skills to craft user-centric, responsive designs to support team-driven development initiatives.

Projects

February 2023 - present

- <http://siminpaksirat.com>
- Built a personal website, using React, JavaScript, Three.js, GSAP, GLSL, Vite, and deployed with Netlify.

- <http://creetures.com>
- Prototyped, implemented, and launched bootcamp capstone project in a month-long project in a team of five.
- Designed the overall architecture of the application.
- Led frontend design prototyping using Figma.
- Built with React, TypeScript, Chakra UI, and backed by Supabase.

- <https://github.com/siminpaksirat/grace-hopper>
- Developed shopping website using React.
- Implemented persistence layer with Postgres and Sequelize.
- Used JSON Web Tokens for seamless authentication experience.
